

AER-DEC™

Integrated Sink

Soap. Rinse. Dry. All three steps without taking any.

Step up to the future of sustainable restroom design — the AER-DEC™ Integrated Sink. The AER-DEC is the perfect innovation for any high-end washroom. Soap dispenser, faucet, hand dryer, and sink basin all designed to work together as one beautiful, touch-free, hygienic, highly efficient system.

Hygienic

Sensor activated soap dispenser, faucet, and hand dryer improve hand washing hygiene.

Customizable

With multiple size, material and color options, you can design your restroom around the AER-DEC or the AER-DEC around your restroom.

Energy Saving

The Sloan® Hand Dryer consumes less energy than conventional hand dryers by utilizing sensor activation and automatic shut-off.

Safe & Clean

The AER-DEC eliminates wet floors from dripping hands and overflowing waste paper baskets making the restroom a safer, cleaner environment.

Cost Saving

The AER-DEC eliminates the need for paper towels and reduces maintenance, saving up to 95% in operation costs.

Water Saving

A range of flow rates offers varied user experiences and water conservation.

SLOAN[®]
Water Connects Us™

AirBasin™

Each element of the AER-DEC™ is designed to create a fully integrated system, but the key to that integration is the AirBasin™.

- Airflow redirection eliminates backsplash and updrafts
- Material options include Quartz (Silestone® or DuPont™ Zodiaq®) or 100+ colors of DuPont™ Corian®
- Fully customizable width or standard sizes of 30", 60", 90" or 120"
- Optional LED lights, coat and purse hooks, custom trash receptacles and more

Sloan® Soap Dispenser

Designed to work hand-in-hand with the AER-DEC Integrated Sink, these soap dispensers promote cleanliness and hygiene at every level.

- Touch-free operation improves hand washing hygiene
- Dispenses a pre-measured application of soap to reduce soap waste
- Low soap indicator light makes for easier maintenance

BASYS® Faucet

AER-DEC features the revolutionary BASYS® sensor-activated faucets, field researched and specifically engineered to meet the demands of the commercial plumbing industry.

- Active Infrared sensing for hygienic touch-free operation
- Multiple body types provide visual and functional options
- Battery, solar or hardwire offers multiple power options and energy conservation
- Adjustable flow rates ranging from .5 gpm to 1.5 gpm saves water
- Above deck electronics make accessibility easy

Sloan® High-Speed Hand Dryer

Finally a hand dryer where you need it. AER-DEC brings the power and innovation of the Sloan hand dryer off the wall and right to your hands.

- Adjustable sound suppression air delivery system is quieter than conventional hand dryers
- HEPA Air Filter removes 99% of bacteria at 0.3 microns
- Eliminates paper towels and reduces maintenance, saving up to 95% in operation costs
- Adjustable on/off heat option reduces energy use
- Uses less energy than conventional hand dryers

For A Room Unlike The Rest

The combination of elegance and proficiency make the AER-DEC Integrate Sink perfect for any high end, high traffic bathroom from **hotels** and **restaurants** to **museums**, **corporate offices**, **stadiums**, **arenas**, **airports**, and more.
